**Summary:** Front-end developer with over 3 years of commercial experience and a passion for coding that's been growing strong since 2019. I'm excited to join an experienced team where I can share, learn, and contribute at every level. For me, collaboration goes beyond just writing code - I love being part of the creative process, from brainstorming ideas and shaping designs to solving technical puzzles and improving user workflows. Both a solo front-end developer, as well as a team player, very Agile-friendly.
